POLICY NAME	Curriculum Statement
PURPOSE	To ensure all employees are aware of the School's curriculum which underpins the mission, culture, ethos and aims of the school. To ensure all pupils are offered an inclusive, developmental curriculum according to individual need, age, aptitude and ability.
APPLIES TO	All pupils
OTHER ASSOCIATED DOCUMENTS OR POLICIES	PHSE, SRE, EAL, SEN and Careers

The curriculum at Teesside High School underpins our Mission, Culture and Ethos, and our Aims statements. This Curriculum Statement should be read in conjunction with other policies including PSHE and Careers.

Policy Statement

Teesside High School offers an inclusive, developmental curriculum for all its pupils according to individual need, age, aptitude and ability. This is designed to provide students with rich learning experiences in linguistic, mathematical, scientific, technological, economic, human and social, physical and aesthetic, cultural and creative activities. The school strives to provide an education that takes into account the ages, aptitudes and needs of all pupils, including those with an EHCP; ensuring effective preparation of pupils for the opportunities, responsibilities and experiences of life in British society.

In addition, the school aims to promote and support fundamental British values; these include appreciation of democracy, the rule of law and the value of individual liberty, as well as the overarching encouragement of mutual respect and tolerance of those with different faiths or beliefs.

In the Early Years (Nursery and Reception classes) the Early Years Foundation Stage Framework (EYFS) provides the starting point for planning, resourcing, teaching and assessment. The EYFS is made up of seven areas of learning that are inter-connected. The three prime areas are Communication and Language, Physical Development, and Personal, Social and Emotional Development. There are also four specific areas, through which the three prime areas are strengthened and applied. These are Literacy, Mathematics, Understanding of the World, and Expressive Arts and Design. Both Nursery and Reception aged children work within these areas, mainly through a play-based approach with their class teachers and teaching assistant. The children also receive specialist PE and Music lessons, and French in Reception.

At Key Stage One English, Mathematics, Guided Reading, Computing, RE, French, PSHE, Handwriting, International Primary Curriculum (IPC) and Phonics lessons are delivered by members of the Prep Teaching staff. The International Primary Curriculum includes Science, Geography, History, Art and DT and International Studies, in a creative theme based approach. Music and PE lessons are delivered by subject specialists.

At Key Stage Two children are taught the same subjects as at KS1, but with more specialist teaching taking place as children move up the Key Stage. Again, there are common IPC topics for Lower Prep (Years 3 & 4) and Upper Prep (Years 5 & 6). The majority of pupils within Key Stage 2 receive weekly MFL lessons, delivered by a specialist teacher. Throughout KS2, children will study a different language each academic year on a 3-year rolling programme. In 2023/24 this will be French for Upper Prep and Spanish for Lower Prep. Those pupils with poor literacy skills receive additional English tuition with a teaching assistant at this time. In Years 5 & 6 pupils are banded together for Computing, Guided Reading, IPC, Music, SPaG, PE and RE. They are taught in their specific year groups for Mathematics, English and PSHE. There is also an enrichment programme which allows the children to develop broader and more specialist skills.

At Key Stage Three students follow a broad curriculum consisting of English, Mathematics, Science, RE, History, Geography, IT, PE, Art, Music, Drama and Design Technology as well as a range of languages are also taught to allow for a broad and balanced curriculum. Where possible students are taught in sets to allow for stretch and challenge at all levels.

All pupils are taught French from Year 7 with Latin and German being introduced from Year 8 and continuing into Year 9.

At Key Stage Four, we offer a range of IGCSE and GCSE courses. Students are required to study the core subjects of English Language and Literature, Mathematics, PE and Science. The other option choices are selected from blocks of subjects that change every year, depending on cohort preference, but the subjects offered are:-

Separate Sciences, History, Geography, Computer Science, French, German, Latin, Food Technology, Art, 3D Design, Music, Drama, Business Studies, RE and Sport Studies.

If sufficient interest exists students may study GCSE Further Maths or Astronomy providing they meet all academic requirements. This will be in addition to the normal academic timetable.

AS, A levels, BTEC and other level 3 qualifications are studied at Key Stage Five. Students generally choose four subjects at AS level providing they have a sufficient average GCSE point score. This then reduces this to three subjects at A2. Subjects are selected from blocks which change every year but the subjects offered are :-

English Language, English Literature, Mathematics, Further Mathematics, Biology, Chemistry, Physics, Psychology, Classical Studies, Latin, French, German, Business Studies, Economics, Art, Music, Food Technology, Design Technology, Computer Science, Criminology, Health and Social Care, Sports Studies, Theatre Studies, Politics and Applied Science

All pupils study a comprehensive PHSE programme that reflects the school's aims and ethos and encourages respect for other people, paying particular regard to the protected characteristic set out in the 2010 Equality Act (a). It is structured to meet the needs of the students at that particular key stage providing them the opportunities, responsibilities and experiences that will prepare them for adult life. Our PHSE programme is fundamental to meeting the requirements for sex and relationship education and to support and develop healthy relationships for life. Throughout the programme Careers education forms an integral part of the PHSE programme. We have Morrisby, an impartial provider, who gives careers profiling for life for all students from year 9 upwards, including individual guidance to sixth form pupils on a broad range of career options. We also hold an annual Careers Convention in school to help students to explore possibilities and fulfil their potential.

The EPQ is offered within the PHSE programme at KS5 and all capable pupils are encouraged to study for this during their time in Y12 and Y13.

We also have a comprehensive enrichment programme with activities offered during lunchtime and at the end of the school day. Prep pupils attend 2 activities that enhance their mathematical and sporting skills each week, whilst also having the opportunity to enrol in numerous lunchtime and after school co-curricular clubs. Senior pupils attend a minimum of 3 activities which can be chosen from a variety of sporting, musical and enrichment activities as well as a number of academic clinics. KS5 students are welcome to attend but it is not compulsory. KS5 pupils are encouraged to take a lead role in activities as part of their preparation for adult life.

All pupils have the opportunity to learn and make progress; subject matter studied is appropriate for the ages and aptitudes of pupils, including those with an EHCP. Pupils with an EHC plan will follow an appropriate teaching timetable so that the education received fulfils the requirements of the plan. For pupils whose principal language is not English, adaptations are made to their curriculum which could include additional lessons in written and spoken English and a reduced curriculum where necessary. Please refer to the EAL policy for further details.

Pupils who are above compulsory school age will follow a programme of activities which is appropriate for their needs.
